Total flexibility

Unique design

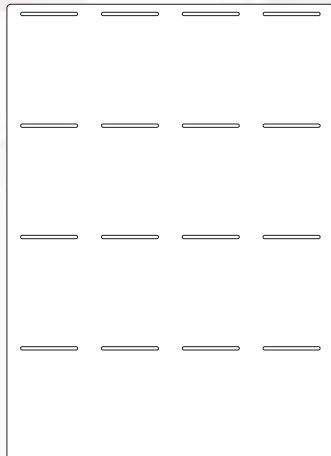

# Cordoba Panel from Floreeda

Our unique design takes a standard window display panel and gives it the flexibility of a slatwall panel.

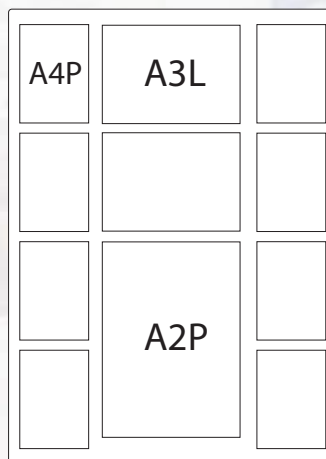

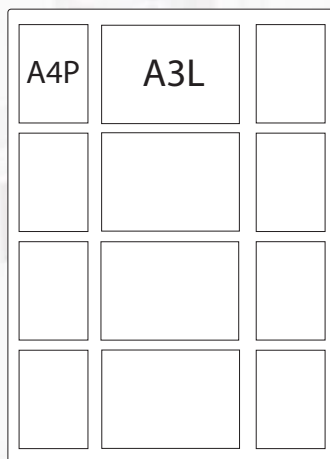

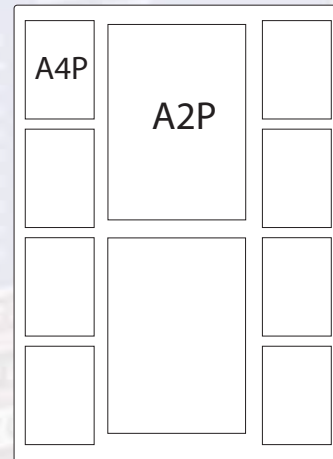

This window display is both versatile and interchangeable with the ability to display A4, A3 & A2 posters holders in both portrait and landscape format.

This system is perfect for the ever changing market, allowing a larger 'Product' or 'Deal of the month' poster to be incorporated into the display with ease.

The panel can be fixed with stand off locators to a wall or used with our cable/rod systems.

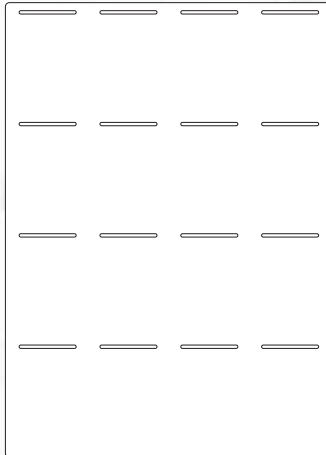

Shoe shelves / product shelves can also be used with this concept of backpanel.
